Businesses use cloud-based ERP & HCM solutions to improve operational efficiency and agility to compete and thrive in today's digital landscape.

Did you know that **94%** of companies used cloud services in 2023?

ERP (Enterprise Resource Planning) and HCM (Human Capital Management) systems were once the backbone of operations but now limit businesses' potential for growth and adaptability.

How can a unified cloud-based ERP & HCM system help?

Low Maintenance & Continuous Updates

Cloud systems can be continuously updated with the latest and greatest features and functionality without worrying about updating hardware or software on-premise.

Scalability

Cloud-based solutions grow with you, effortlessly scaling to fit the needs of your business and people without the need to update hardware.

Anywhere Access

Improve communication and collaboration by giving your workforce the ability to access critical systems and data from anywhere at any time.

Data-Driven Decision Making

With anywhere access, employees can see real-time data and analytics that enable them to make informed decisions from wherever they are.

Compliance

Cloud solutions can dramatically improve regulatory compliance with its ability to define and automate business processes and policies that help companies follow the rules.

Unified Platform

Seamlessly connect with other cloud applications, including IoT, to improve core processes and create an integrated ecosystem that enhances efficiency and provides holistic insights.

Cost Efficiency & Predictability

Reduce the upfront cost of implementing an on-premise legacy system and eliminate the complexity and expenses associated with continued maintenance.

Digital Transformation

Businesses are adopting cloud-based technologies to enhance their daily operations and increase competitiveness. This strategy not only boosts revenue and employee productivity but also increases data security, enhances customer service, and supports effective communication.

Employee Experience

A unified HCM and ERP can improve every aspect of the employee lifecycle from recruitment to retirement.

Future Proof

Publishers are investing more in cloud solutions vs on-premise solutions, and companies are moving to cloud systems that will grow with them and not become obsolete.
