Simplify Scheduling and Place the Right People Where You Need Them.

Creating meaningful schedules that meet the needs of your business and people can be complex, time-consuming and frustrating. Scheduler solves this challenge by automatically generating optimal schedules that balance operational demands, required skills, compliance rules and your budget. Our AI-powered solution proactively builds schedule recommendations based on your organization's needs while considering your employees' availability and preferences.

How it Works

Scheduling enhances workforce management by providing real-time visibility into critical data such as employee details, budget constraints and staffing needs, enabling managers to make informed decisions and create effective schedules. The system minimizes compliance risks by automatically identifying employees based on predefined criteria and notifying you if any scheduling actions violate established rules, allowing for timely adjustments to maintain compliance. Additionally, it empowers employees through self-service tools, allowing them to pick up open shifts if they meet qualifications and receive notifications of new schedules directly from desktop or mobile devices.

Benefits For Managers

- Automatically generate best-fit schedules based on a set of predefined criteria
- Make changes on the fly to meet scheduling needs in the moment
- Adhere to scheduling rules and policies that will help avoid grievances, litigation, fatigue and fines
- Gain real-time visibility into accurate employee data, payroll costs and staffing demand
- Get visibility into employee skills, certifications and experience in order to make the best staffing decisions
- Manage schedules anytime, anywhere, on any device

Benefits For Employees

- Easily access daily, weekly and monthly views of your schedule from any device
- Set your scheduling preferences so managers can take them into account when building schedules
- Manage availability in real time to give coworkers and managers the insight they need to stay informed
- Balance life and work by syncing your personal and professional schedule in one place
- Stay up-to-date on the latest scheduling changes, open shifts and swap requests

Scheduler

Features

- Skill, credential and certification tracking
- Automated employee-to-shift matching algorithms
- Business data-import tool
- Pattern template scheduling
- Budget and workload management
- Rule and constraints library
- Drag-and-drop schedule builder
- Unassigned shift management
- Call list
- Employee self-service such as coverage requests, open shift requests and swaps
- Automatic schedule sync for timecards, time off and leave of absence
- Two-way texting for employee and manager self-service functionality
- Standard report library, including employee availability and preferences, open shifts, requests for coverage, roll call, scheduled vs. actual, shift-swap requests and more
- Mass editing capabilities
- Change alerts and notifications
- Mobile Accessibility: Accessible via mobile app for anytime, anywhere management.

Scheduling is all about smart choices, keeping an eye on things and giving employees some freedom to make it work better and keep everyone more engaged. For a demo or more information, contact us at **myworkforcego.com/contact**.
