

Welcome to the future of work.

Empower your team with easy to access, data-driven insights fully customized to their needs. Bryte AI is more than a tool; it's a trusted, people-first partner. By leveraging data about your people, work, and culture, Bryte works alongside your teams to deliver personalized guidance. The result is a more supportive, thriving workplace where every employee, manager, and executive is empowered to achieve better outcomes, making your journey toward becoming a truly great workplace easier and more human than ever before.

Auto Added Functionality

Custom Form Builder

Upload a PDF of a custom form with Bryte AI. The system will automatically analyze it and place the right field type in the right spot to recreate that form in the system.

Module Related Functionality

You'll also have access to the following features based on the modules you have.

Employee Assist¹

Quickly find the answers you need. The search function brings back results generated from your organization's documents, including your employee handbook.

Job Genius & Interview Guide²

By entering the tasks and skills needed for a position, instantly generate a job description and an interview guide aligned to your corporate culture.

Benefit Formula Generator³

Enter a description of the calculation you need to generate a formula you can use. It works for any "coverage amount" type.
